LDARtools New Web Store Now Open for Business!

We are pleased to announce that LDARtools new web store is now accepting orders. The store features a wide variety of items including the following:

- Juniper Systems Archer Field PC® and Accessories
- FECrystal
- Cal2.0™
- FEJupiter™
- FEScout™
- SpanBox
- TVA Supplies
- And more!

The store also includes quick and easy Google Checkout which allows us to accept, VISA, Master Card, American Express and Discover.

To visit the store click on this link
<http://ldartools.storeldar.com>.

If you don't see an item in the store that you think we should add email support@ldartools.com with "Web Store" in the subject line.

Shepherd Notification System

Shepherd is a computerized system for linking an array of personal H₂S sensors with a satellite communications network that triggers a series of communications to a central information center whenever an H₂S leak is detected in a remote location.

We know what is at stake when an H₂S Release occurs, health, safety, morale, liability, and the bottom line. Let the Shepherd Notification System by LDARtools take care of you.

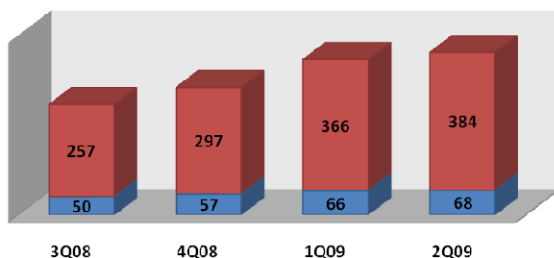

For more information about Shepherd visit www.ldartools.com and click on the "[Click here to see Shepherd respond to an H₂S release](#)" link in the upper right hand corner of the home page.

Shepherd order received!

We have developed a state-of-the-art H₂S monitoring and notification system called Shepherd. This week we got a purchase order for 19 of the systems from Schlumberger in West Texas. We firmly believe this is just the start of something that will be very, very big!
