## Introducing FEInspect™

Recently industry has become aware of a bug in LeakDAS Mobile that causes a single ppm value to be saved for multiple components at the same time. This can lead to monitoring records being created even if the component was not monitored.

Our programmers worked non-stop and created a plug-in for LeakDAS Mobile that fixes the problem. We didn't just fix the problem; we built a tool that will make our jobs easier and more efficient.

The software is called FEInspect™ and it will enable anyone using a

FECrystal™ to use an inspection screen that is far more user friendly than the screen(s) offered by LeakDAS Mobile AND prevents the problem with multiple readings being recorded.

We are in the second full week of field testing and will be rolling out the new inspection plug-in to more sites next week. Then, hopefully, we will be ready for full deployment.

Once ready for deployment, FEInspect™ will be provided **FREE of charge** to all clients who are using FECrystals™.

We will post it to the download section of [www.ldartools.com](http://www.ldartools.com) along with all related documentation. We look forward to hearing your feedback on this plug-in.

## phx21™ Update

US Patent Application Number 61/057124

Quick update: LDARtools is in the process of building the first group of instruments. Three will be used for achieving the intrinsic safety certification.

4 others will be deployed on a test basis directly to local sites.

We will be rotating them around, for two week trials, at large client sites so that you can see and experience what all the excitement is about.

## Product Upgrades

### Hero Desktop Manager / FEJupiter™ / Cal2.0™

Obtain the Hero Desktop Manager 2009.1.30.1, FEJupiter 2009.1.29.1, and Cal2.0 for Windows Mobile 2009.2.5.1 from the Downloads page of the LDARtools website ([www.ldartools.com](http://www.ldartools.com)). Instructions on how to perform an update are detailed in the LDARtools Manual-Section 4, also available for download on the same page.

Contact an LDARtools Support Specialist ([support@ldartools.com](mailto:support@ldartools.com) or 1-877-788-1110 ext. 1) with any questions.

## Installing LDARtools Across the Nation
